NEW SOCIETY PROJECT: County Records Prior to 1850

Lately we are hearing a lot of talk about the 'closing' of records. Some states records are already closed. We have set as our goal the purchase of as many county records as possible, beginning with those records prior to 1850.

ONLY the following states have their records for sale at this time. Prices vary for each state. (Price shown is per roll).

Arkansas - 10.00	Kentucky - 12.00	Georgia - 12.50
S. Carolina - 20.00	Tennessee - 12.00	Missouri - 5.00
N. Carolina - 10.00		

If the Mormons have copied the records of a state you are interested in, the film will cost 12.50 per roll. Check with the Genealogy Section to determine if your states records are among those copied.

The project film to be purchased will be prior to 1850, but donations can be accepted for any time period for those states listed above.

RISING COST OF OBTAINING RECORDS.....

The current cost of obtaining a certified death record from the State of Texas is now \$8.00.

Torrey's New England Marriages

Overview From 1927 to shortly before his death in 1962, Clarence Almon Torrey sat in the reading room of the New England Historic and Genealogical Society (NEHGS) library, and looked at virtually every book on early colonial New England that the library had: over 2000 town histories, genealogies, vital records, periodicals, and some manuscript collections. When he found a reference that stated or implied a marriage of a couple who resided in New England prior to 1700, he noted it in ledger books, recording over 37,000 marriages.

In 1979 NEHGS microfilmed the ledger books; the Dallas Public Library (DPL) has that microfilm. In 1985 a book containing part of the information in the ledgers was published, which DPL also has. Used together, the microfilm and book provide an unparalleled finding aid for colonial New England research.

Content The title, New England Marriages Prior to 1700, is misleading. It more accurately might be titled "Couples Residing in New England Prior to 1700", because many of the listings are inferred, from the birth of children, for example, and couples who immigrated after the marriage are included.

The information in the published volume includes:

- name of husband in alphabetical order, his birth and death years
- name of wife, her birth and death years, and whether 1st or 2nd wife
- other marriages of wife
- towns of residence in New England

The information in the handwritten ledgers includes, in addition to the above:

- sources in which Torrey found information about the husband or wife, including page number. DPL has many, but not all, of these sources.

Location New England Marriages Prior to 1700 by Clarence Almon Torrey is a single volume, call number R929.374 T694N.

Torrey's manuscript is on seven rolls of microfilm in the first cabinet of Massachusetts microfilm.

Aids The manuscript and book provide leads that genealogists looking for ancestors later than 1700 can use.

- The towns of residence of persons of a surname provide a good starting point for searching town histories and vital records.
- The index to the book contains alternate spellings of surnames and a full-name index of all additional names in the listings, including wives' maiden names and names of other husbands, providing access to collateral lines.
- The third column of the microfilm lists the source, including page number, where Torrey found the information. This, in effect, provides a surname index to every major pre-1960 New England genealogical publication, which may contain information on later generations.

Torrey's New England Marriages (Continued)

- Aids** In both the book and microfilm, the hardest part may be the notation system, further complicated on the microfilm by the difficulty of reading the handwritten ledger. Some clues:
- Read the introduction to the book. It is very thorough.
 - "1/wf" means the first wife of the man listed. "m/2" means the name of the wife's second husband is listed, also.
 - "b 1642" means married "by" 1642, probably the birth of a child.
 - "ca" means circa (about). "?" indicates that Torrey or the source had some doubts about the information.
 - Parentheses () sometimes appear around the wife's maiden name. Square brackets [] indicate an implied earlier marriage.
 - Torrey listed NEHGS's Register as "Reg" (not NEHGR), The American Genealogist as "Am Gen" (not TAG) and Savage's Dictionary as "Sv".
 - Family genealogies are listed by surname and year of publication. If you cannot identify the source, check the introduction, the source pages of the American Genealogical Biographical Index, the microfiche catalogue to the LDS Family History Library, and catalogues to other collections. Genealogies of common surnames have a number instead. A listing of all source codes is at NEHGS.
