### Military Records A Wealth of Information

War and peace—there are military records for individuals throughout history regardless of whether there was a war being waged. Sometimes, it's only a military registration form, but it is still a record that can provide valuable information about your ancestor.

The goal of the Dallas Genealogical Society shall be to educate, by creating, fostering, and maintaining interest in genealogy; to assist and support the genealogy section of the J. Erik Jonsson Central Library in Dallas, Texas, or to its legal successor; and to collect, preserve, copy, and index information relating to Dallas County and its early history.

their military service, including time of service and any pensions paid. These records can also find or confirm birth information and give evidence of family relationships. Pension files can be great sources of information not only about the veteran but also about family members who survived if the individual perished during the war or later. There may even be details about capture or illness.

State or federal governments generally created and preserved these records and today many are available online and at the National Archives and other repositories around the country.

Whether you're just getting started with military research or you want to more deeply explore records you've accessed previously, there is something here for you.

According to the National Archives, the most requested military records are from the War of 1812. Now these more than 7.2 million images are being digitized and will be available online.

Join us as we spend the day with Craig Scott discussing various types of military records, where to find them and how to use them.
