DGS Has a **New** Web Site

The next time you visit our web site you will notice that it has changed – a lot!

Our webmasters (Todd DeDecker and Tony Hanson) have just completed a 6-month effort to re-design, update and improve our web presence using WordPress, which has emerged as the most widely used web and blog software in use today.

A large part of our focus was making the information we had on the old site much easier to find and use. In addition, the new site is much more compatible with smart phones and tablets.

Another advantage of using WordPress is that it has a wide variety of add-on tools that can be used to increase the usefulness of our web site. We have several enhancements lined up that you can expect to see in the coming months.

Please visit the site (<http://dallasgenealogy.com>) to view the changes for yourself. If you encounter any bugs or problems, please click on the 'Contact Us' link at the top of the page to tell us about them and we'll get them corrected as soon as we can.

There will be a demo of the new site at the September 5 General Meeting.
